

MYNXG Architecture

Flow: Our Flow is an integration layer to connect people and business processes through a workflow engine (BPMN) with secure IOT data.

Core: Our Core is a secure IOT service layer, which can be hosted in all key global cloud environments or run on premises.

Edge: Our Edge products are high performance industrial IOT gateways to connect multiple assets to our secure industrial IOT platform.

Sense: Our Sense gateways use edge computing technology to gather real-time data from individual assets.

With billions of industrial devices connected each year, it's more important than ever to secure yours. Protect your physical infrastructure and its data to the highest international cybersecurity standards. MYNXG hardware based Trusted Compute Base (TCB) creates end-to-end security solutions to protect your assets and data.
