

COMPANY DESCRIPTION

Impact the future! We are pioneers in smart, real time and secure industrial IoT solutions. We believe in a platform approach securely connecting and processing sensor data up to the data visualization in the cloud and connecting with existing Enterprise Resource Planning (ERP) systems. We realize amazing business value for our global customers by optimizing and enabling them to develop new business models.

Where your path leads you? Right in the middle of our MYNXG Platform solution for Industry 4.0, with Blockchain, Cloud, Cognitive Technologies and Data Analytics solutions.

YOUR ROLE

As mechatronics engineers you will accompany our customers with a lot of positive energy from strategic consideration to successful implementation.

- Independent assembly, testing and commissioning of MYNXG products and components, both in-house and at the customer's site
- Maintenance and repair of MYNXG products in-house and at the customer's site
- Programming of PLC systems
- Build and prepare product samples / templates for manufacturing
- Designing technical documents for production and installation of MYNXG products
- Follow up customer inquiries (After-Sales & Field Application Service)

YOUR PROFILE

- Completed vocational training as mechatronics technician
- Min. 3 years professional experience
- Good command of spoken and written English
- Experience in PLC programming (e.g. Siemens, Rockwell, Phoenix, Weidmüller)
- Ability to create technical documents with SolidWorks and ePLAN
- Willingness to travel worldwide
- Creativity and courage to find unconventional solutions are welcome
- Good writing and communications skills in English are required

THIS EXPECTS YOU

- A network of experts working on the future of the intelligent enterprise
- A specially tailored introduction that takes your personal interests and strengths into account
- Performance-related payment
- Mentoring and targeted training in new topics
- An environment where growth and new ideas are desired

Take the next step on your professional journey with us. Start immediately, of course. We are looking forward receiving your CV (English or German) and letter of references. Please address them as one PDF document to: gaby.moeller@mynxg.com.
